

ALUMINIUM DECKING

Mextru's base systems come in 3 heights to cover all your base needs

Mextru are a leading manufacturer of aluminium decking. Our system being of all aluminium construction is fire resistant, very competitive, and has several unique features, including the best non-slip surface on the market, with virtually no maintenance required.

Aluminium Decking by Mextru is a complete decking system, with one of the most advanced, high strength substructure systems available on the market. The base structure is available in 3 standard heights to cover all your requirements, and all beam options are the same width, and use the same unique fixing system, which dramatically cuts down on-site installation time.
